INTERNATIONAL JOURNAL OF CHEMICAL KINETICS, VOL. VI, 955–957 (1974)

Subject Index, Vol. VI

ABSOLUTE RATE CONSTANTS for abstraction of α-H-atom from tetralin by the *tert*-butylperoxy radical by the hydroperoxide method (527)

ABSTRACTION of H atoms from hydrogen chloride by trichloromethyl radicals (481); of H atoms from cyclohexane by trichloromethyl radicals (493); of H atoms from toluene by C_6F_5 radicals (257); of I atoms by excited I atoms from methyl iodide (297); of Cl atoms from carbon tetrachloride by cyclohexyl radicals (493).

ACETAL, hydrolysis, proton transfer in (143)

ACTIVATION ENERGY calculation for nucleophilic substitution reactions in alkyl halides (457), (467)

ADDITION of cyclohexyl radical to trichlorofluoroethylene (265); of methyl radicals to carbon monoxide (855); of O atoms to fluorinated ethylenes (443)

ANCHIMERIC ASSISTANCE in vapor-phase acetate thermolysis (849)

APPROXIMATION, steady-state (fact or fiction) (787)

AQUATION OF *NN'''*-bis-[α-(2-pyridyl)benzylidene]triethylenetetramineioron(II) in acid solution (133)

ARRHENIUS PARAMETERS for reactions of O atoms with fluorinated ethylenes (443); corrections for self-heating (531)

ATOMIC RESONANCE ABSORPTION, flash photolysis technique, applied to the collisional removal of Pb(6^3P_1) and Pb(6^3P_2) by helium, argon, hydrogen, deuterium, nitrogen, oxygen, carbon monoxide, nitric oxide, carbon dioxide, nitrous oxide, methane, ethylene, acetylene, carbon tetrafluoride, sulphur hexafluoride, and lead tetraethyl (61); in the vacuum ultra-violet, flash photolysis technique, applied to the collision quenching of O(2^1D_2) by helium, neon, argon, krypton, and xenon (77)

BIRADICAL intermediate in the addition of propene to cyclohexa-1,3-diene (545)

BOND DISSOCIATION ENERGIES in alkyl nitrites (877); in iodopentafluorobenzene (257); in nitroso compounds (813)

CATALYSIS of hydrogen peroxide decomposition, by ferric ion (507)

CHEMICAL ACTIVATION, isomerization of bicyclo[3.10]hex-2-ene (899)

CHEMICAL LASERS produced from O(^3P) atom reactions (1)

CHLORINATION, liquid phase, addition-substitution competition (437); of 1,2-dichloroethane, trichloroethylene, and tetrachloroethylene (437)

α-CHYMOTRYPSIN CATALYSIS, free energy-reaction, coordinate profile for, of hydrolysis of *N*-acetyl-L-aminoacid methyl esters (801)

COLLISIONAL AND REACTIVE DEACTIVATION of excited ($^1P_{1/2}$) iodine atoms (297)

COMBINATION of methyl radicals (887); rate of trichloromethyl radicals (481); rate of cyclohexyl radicals (493)

COMPUTER PROGRAM for Kassel Integral (875)

COMPUTER SIMULATION of iodine atom reactions with methyl iodide (297)

CONCERTED DECOMPOSITION of hydrogen peroxide (383)

DEACTIVATION, collisional and reactive, of excited ($^3P_{1/2}$) iodine atoms (297)

DECARBOXYLATION of malonic acid in normal alkanols, kinetics of (713)

DECOMPOSITION, of acetylenedicarboxylic acid in acetephenone (567); of alkanes (359); of *t*-butylmethyl ether (631); of 1-deuterio-1,1,2-trifluoroethane (573); of

ethylallyl ether (429); of hydrogen peroxide (383); of hydrogen peroxide by ferric ion (507); of 2-nitrosoisobutane (813)
DIATOMIC MOLECULE, reactions involving halogens and hydrogen halides (29)
DISCHARGE FLOW (587)
DISSOCIATION, of iodopentafluorobenzene in a toluene carrier system (257)
ELECTRON SPIN RESONANCE SPECTRUM, of *p*-tetrafluorobenzosemiquinone radicals; of *p*-tetrafluorobenzosemiquinone radical anions (125)
ELECTRON TRANSFER REACTIONS, of the superoxide ion (643)
ENERGY SURFACES, for proton transfer (143)
ENERGY TRANSFER, in the N-CO_2 system (229)
ENTROPY OF ACTIVATION, calculation for nucleophilic substitution reactions in alkyl halides (457), (467)
FLASH PHOTOLYSIS (401); of methyl iodide (297); of *s*-trinitrotoluene solutions (89); ultra-violet resonance absorption technique, in the study of the collisional removal of Pn(6^3P_1) and Pb(6^3P_2) by atoms and simple molecules (61); vacuum ultraviolet resonance absorption technique, in the study of the collisional quenching of O(2^1D_2) by the noble gases (77)
FORMATION, complex, between magnesium and EBT (39)
HAMMETT's ACIDITY FUNCTION, correlation of, the rate of oxidation of inositol by V(V) (15)
HEAT OF FORMATION, of acetyl radical (855); of alkyl nitrite (877)
HYDROLYSIS, acid, mechanism of, aromatic o-carboxy amides and relative imides (245)
HYDRONIUM IONS, catalysis of acetal hydrolysis (143)
IGNITION, of hydrogen, carbon monoxide, oxygen system in shock waves (921)
ISOMERIZATION, of pentyl radicals (291); of $SO_2(^3B_1)$-photosensitized in *cis*- and *trans*-2-butene (829); unimolecular, of 1,1-divinylcyclopropane (893)
ISOTOPE EFFECTS, in the kinetics of the thermal gas-phase reactions, of 1,2-epoxycyclohexane-3,3,6,6-d_4 (161)
KASSEL INTEGRAL, computer program for (875)
KINETIC SPECTROSCOPY, of O(2^1D_2) quenching processes (77); of Pb(6^3P_1) and Pb(6^3P_2), collisional removal processes (61)
KINETIC STUDY, of self-disproportionation of *p*-tetrafluorobenzosemiquinone radicals (125)
KINETICS, and mechanisms, of the slow oxidation of hydrogen (693); of nucleophilic substitution processes, theory (457), (467); of *NN'''*-bis-[α-(2-pyridyl)benzylindene]triethylenetetramineiron(II) with cyanide (133), with hydroxide (133), with peroxodisulphate (133); of the reaction of O(^3P) with C_2HCl_3 (553); of substitution reactions of pentaaminecobalt(III) complexes in dimethyl sulfoxide (51)
LASERS, chemical, from O(^3P) atom reactions (1)
LIBIDO RULE, application to acetal hydrolysis (143)
MECHANISMS, of hydrolysis, of acetals (143); of initiation in the system hydrogen peroxide-ferric ions (383); pyrolyses, of 2-butene (763); for oxidation, of cyclohexanehexol (15); for oxidation, of hydrocarbons with added hydroperoxide (279); of reaction of chlorine with bromine (395); of vapor-phase acetate thermolysis (849)
MIGRATION, of hydrogen, in pentyl radicals (291)
OXIDATION, of C_2HCl_3 (553); of cyclohexanehexol (15); of tetralin with hydroperoxide (279); of hydrogen, oxygen atom production in (921)
OZONOLYSIS, of allene (417); gas-phase, of simple olefins at low pressures (725)
PHASE-SHIFT METHOD, for deferring rate constants of O atom-olefin reactions (741)
PHOTOLYSIS, OF *p*-tetrafluoro-1,4-benzequinone in dioxane (125); of trifluoromethylazomethane (517)

POLAR TRANSITION STATE, in the unimolecular thermal decomposition of diallylamine, in the gas phase (371)
PRESSURE DEPENDENCE, of propene ozonolysis, rate below 100 mtorr (725)
PROTON TRANSFER, pathways in acetal hydrolysis (143)
PYROLYSIS, of alkyl nitrites (945); of 2-Butene (763); of iodopentalfuorobenzene, in a toluene carrier system (257)
RADICAL-RADICAL REACTIONS, alkyl radicals in solution (453)
RATE DATA, corrections for self-heating (531)
RECOMBINATION, H-atom (753)
RELAXATION, molecular, processes in triatomic molecules (229)
RESONANCE ABSORPTION, study of the OH-acetylene reaction (587)
RESONANCE FLUORESCENCE (401)
RETROENE REACTIONS, decomposition of ethylallylether (429)
SHOCK TUBES (753)
SOLVENT EFFECTS, in the hydrolysis of diol monoesters (103)
SOLVENT-JUMP, relaxation method (687)
SPIN ORBIT RELAXATION, of Pb(6^3P_1) and Pb(6^3P_2) on collisional, with atoms and simple molecules (61)
STEADY-STATE APPROXIMATION, fact or fiction (787)
STEADY-STATE, kinetics of methyl radical into (111)
THERMAL EFFECTS, errors in rate constants and Arrhenius parameters (531)
THERMOLYSIS, of *anti*- and *syn*-7-acetoxy-7-methylnorbornene and 7-acetyoxy-7-methyl-norbornane (849)
T-JUMP STUDY, of the reaction between magnesium and EBT (39)
TRANSITIONAL STATE, for nucleophilic substitution reactions in alkyl halides (457), (467)
VERY LOW-PRESSURE PYROLYSIS, of alkanes (359); of *t*-butylmethyl ether (631); of 2-nitrosoisobutane (813)
VIBRATIONAL RELAXATION, of HF($v = 1$), by F atoms (597)

INTERNATIONAL JOURNAL OF CHEMICAL KINETICS, VOL. VI, 959–962 (1974)

Index of Compounds, Vol. VI

7-ACETOXY-7-METHYLNORBORNANE, thermolysis of (849);
anti- and *syn*-7-ACETOXY-7-METHYLNORBORNENE, thermolysis of (849)
ACETYL RADICAL, heat of formation, entropy (855)
N-ACETYL-L-AMINOACID METHYL ESTERS, α-chymotrypsin hydrolysis of, in the presence of added nucleophiles (methanol or 1,4-butanediol) (801)
ACETYLENE, collisional removal of Pb(6^3P_1) and Pb(6^3P_2) (61); reaction with hydroxyl radicals (587)
ACETYLENE DICARBOXYLIC ACID, decomposition of (567)
ALKYL HALIDE, kinetics of nucleophilic substitution processes (457), (467)
ALKYL NITRITES (RONO), heats of formation and their RO-NO bond dissociation energies (877); pyrolysis of (945)
ALLENE, reaction with ozone (417)
AQUOPENTAAMMINECOBALT(III) ION, reaction with dimethyl sulfoxide (51)
ARGON, collisional removal of Pb(6^3P_1) and Pb(6^3P_2) (61); collisional quenching of O(2^1D_2) (77)
ARSENIOUS ACID, reaction with aqueous iodine (663)
3,3′-AZO-1-PROPENE, thermal effects during decomposition, errors in A and E (531)
BENZOSEMIQUINONE, anion radical, UV spectrum complex with benzoquinone (643)
BICYCLO[3.10]HEX-2-ENE, chemically activated, isomerization of (899)
BROMINE, reaction rate with chlorine (29)
BROMINE CHLORIDE, reaction of, formation of, from chlorine and bromine (395)
BUTAN-1,4-DIOL MONOBENZOATE, hydrolysis of (103)
n-BUTANE, VLPP of (359)
BUTANOL-1, decarboxylation of malonic acid in, kinetics of (713)
2-BUTENE (*cis* and *trans*) (763); SO_2-photosensitized, isomerization of (829)
t-BUTYL RADICAL, bimolecular self-reaction, in solution (453)
t-BUTYLMETHYL ETHER, decomposition of (631)
tert-BUTYLPEROXY RADICAL, reaction with tetralin (527)
CARBON DIOXIDE, collisional removal of Pb(6^3P_1) and Pb(6^3P_2) (61)
CARBON MONOXIDE, collisional removal of Pb(6^3P_1) and Pb(6^3P_2) (61); reaction with methyl radicals (855)
CARBON TETRAFLUORIDE, collisional removal of Pb(6^3P_1) and Pb(6^3P_2) photolysis of, reactions with cyclohexyl radicals (493)
o-CARBOXYAMIDES, aromatic, and relative imides, mechanism of, the acid hydrolysis of (245)
CHLORINE, reaction rates with bromine and with hydrogen bromide (29)
α-CHYMOTRYPSIN, hydrolysis of *N*-acetyl-L-aminoacid methyl esters by, in the presence of added nucleophiles (methanol or 1,4-butanediol) (801)
CYCLOHEXADIENE, reactions with H-atoms (337)
CYCLOHEXA-1,3-DIENE, Diels-Alder reaction of, with propene (545)
CYCLOHEXANE, reaction with trichloromethyl radicals (493)
CYCLOHEXANEHEXOL, oxidation mechanism of (15)
CYCLOHEXENE, reaction with H-atoms (337)
CYCLOHEXYL RADICALS, combination of, reaction with carbon tetrachloride (493)
DECANOL-1, decarboxylation of malonic acid in, kinetics of (713)

1-DEUTERIO-1,1,2-TRIFLUOROETHANE (573)
DEUTERIUM, collisional removal of Pb(6^3P_1) and Pb(6^3P_2) (61)
DIALLYLAMINE, thermal decomposition in gas phase (371)
DICHLOROCARBENE, oxidation of (553)
DIFLUOROETHYLENES, Arrhenius parameters for, reaction of, with O atoms (443)
2,3-DIMETHYLBUTANE, very low-pressure pyrolysis (VLPP) of (359)
DIMETHYLSULFOXIDEPENTAAMMINECOBALT(III) ION, aquation rate of (51)
1,1-DIVINYLCYCLOPROPANE, unimolecular isomerization of (893)
EBT, reaction with magnesium (39)
ETHYL RADICAL, bimolecular self-reaction, in solution (453)
ETHYLALLYL ETHER, decomposition of (429)
ETHYL BENZOATE, hydrolysis of (103)
ETHYLENE, collisional removal of Pb(6^3P_1) and Pb(6^3P_2) (61)
ETHYLENEGLYCOL MONOBENZOATE, hydrolysis of (103)
1,2-EPOXYCYCLOHEXANE-3,3,6,6-d_4, kinetic isotope effects in the thermal gas-phase, reactions of (161)
FLUORINATED ETHYLENES, Arrhenius parameters for, reaction of, with O atoms (443)
HELIUM, collisional quenching of O(2^1D_2) (77); collisional removal of Pb(6^3P_1) and Pb(6^3P_2) (61)
HEPTANOL-1, decarboxylation of malonic acid in, kinetics of (713)
HEXANOL-1, decarboxylation of malonic acid in, kinetics of (713)
HYDROGEN, collisional removal of Pb(6^3P_1) and Pb(6^3P_2) (61); reaction with oxygen (693); thermal reaction with oxygen atom (921)
HYDROGEN ATOMS (401), (753); reactions with cyclic olefins (337); reaction with nitric acid (617)
HYDROGEN BROMIDE, reaction with chlorine (29)
HYDROGEN CHLORIDE, elimination from chlorinated ethanes (777)
HYDROGEN FLUORIDE, vibrational relaxation, by F atoms (597)
HYDROGEN PEROXIDE, decomposition of (383); ferric ion catalyzed, decomposition of (507)
HYDROPEROXIDE, as chain transfer agent, in oxidation of hydrocarbons (279); evaluated and estimated kinetic data for, gas-phase reactions of (169)
HYDROXYL RADICAL, reaction with acetylene (587)
IMIDES, relative, and aromatic o-carboxyamides, mechanism of, the acid hydrolysis of (245)
INOSITOL, oxidation mechanism of (15)
IODINE, aqueous, reaction with arsenious acid (663)
IODINE ATOMS, chemical reaction and collisional deactivation of $^2P_{1/2}$ with methyl iodide (297)
IODOPENTAFLUOROBENZENE, pyrolysis in a toluene carrier system and determination $D[C_6F_5\text{-}I]$ (257)
ISOBUTANE, very low-pressure pyrolysis (VLPP) of (359)
KRYPTON, collisional quenching of O(2^1D_2) (77)
LEAD ATOMS, collisional removal of Pb(6^3P_1) and Pb(6^3P_2) by helium argon, hydrogen, deuterium, nitrogen, oxygen, carbon monoxide, nitric oxide, carbon dioxide, nitrous oxide, methane, ethylene, acetylene, carbon tetrafluoride, sulphur hexafluoride, and lead tetraethyl (61)
LEAD TETRA-ETHYL, collisional removal of Pb(6^3P_1) and Pb(6^3P_2) (61)
MAGNESIUM ION, reaction with EBT (39)
MALONIC ACID, decarboxylation of, in normal alkanols, kinetics of (713)

METHANE, collisional removal of Pb(6^3P_1) and Pb(6^3P_2) (61)
METHYL IODIDE, flash photolysis of (297)
METHYL RADICALS, combination of (887); reaction with carbon monoxide (855); reaction with oxygen atom (111); reaction with molecular iodine (297)
NN'''-BIS-[α-(2-PYRIDYL)BENZYLIDENE]TRIETHYLENETETRAMINEION(II), reactions in acid solutions and with cyanide, hydroxide, and peroxodisulfate (133)
NEON, collisional quenching of O(2^1D_2) (77)
NEOPENTYLGLYCOL MONOBENZOATE, hydrolysis of (103)
NITRATOPENTAAMMINECOBALT(III), ION dissociation constant of, in dimethyl sulfoxide (51)
NITRIC ACID, reaction with oxygen and hydrogen atoms (617)
NITRIC OXIDE, collisional removal of Pb(6^3P_1) and Pb(6^3P_2) (61); reaction with ozone (725)
NITROGEN, collisional removal of Pb(6^3P_1) and Pb(6^3P_2) (61)
NITROGEN DIOXIDE, reaction with ozone (625)
NITROGEN OXIDES, ozone, propylene, smog chamber modeling (787)
2-NITROSOISOBUTANE, decomposition of (813)
NITROUS OXIDE, collisional removal of Pb(6^3P_1) and Pb(6^3P_2) (61)
NONANOL-1, decarboxylation of malonic acid in, kinetics of (713)
OCTANOL-1, decarboxylation of malonic acid in, kinetics of (713)
OLEFINS, gaseous, reaction with ozone (725)
OXYGEN(401); collisional removal of Pb(6^3P_1) and Pb(6^3P_2) (61)
OXYGEN ATOMS, Arrhenius parameters of, for reaction with fluorinated ethylenes (443); Chemical lasers produced from reactions of (1); collisional quenching of O(2^1D_2), by helium, neon, argon, krypton, and xenon (77); reactions with methyl radicals (111); reaction with olefins (741); reaction with nitric acid (617); reaction with C_2HCl_3 (553); thermal reaction with hydrogen (921);
OZONE, reaction with allene (417); reaction with gaseous olefins, nitric oxide, and nitrogen dioxide (725); nitrogen oxides, propylene, smog chamber modeling (787)
PALLADIUM(II), chloro complexes, reactions with ethylendiamine (309); chloro complexes, reactions with N- and N,N'-methyl ethylenediamines (323)
PENTANOL-1, decarboxylation of malonic acid, in kinetics of (713)
PENTYL RADICALS, isomerizations of (291)
PERFLUOROPHENYL RADICAL, reaction with toluene (257)
PHENYLIODOSOACETATE, reaction with amides (773)
PROPAN-1,3-DIOL MONOBENZOATE, hydrolysis of (103)
iso-PROPYL RADICAL, biomolecular self-reaction, in solution (453)
PROPYLENE, ozone, nitrogen oxides, smog chamber modeling (787)
SULFUR DIOXIDE, photoisomerization of *cis*- and *trans*-2-butene, sensitized by (829)
SULPHUR HEXAFLUORIDE, collisional removal of Pb(6^3P_1) and Pb(6^3P_2) (61)
SUPEROXIDE ION, reaction with quinones (643)
p-TETRAFLUORO-1,4-BENZOQUINONE, photolysis of, electron spin resonance of, self-disproportionation of, decay kinetics of (125)
p-TETRAFLUOROBENZOSEMIQUINONE, radicals, electronic spin resonance spectrum of, self-disproportionation of, decay kinetics of, anion, electron spin resonance spectrum of (125)
TETRAFLUOROETHYLENE, Arrhenius parameters of, for reaction with O atoms (443)
TETRALIN, oxidation of (279); reaction with *tert*-butylperoxy radicals (527)
2,2',3,3'-TETRAMETHYLBUTANE, very low-pressure pyrolysis of (359)
TRICHLOROETHYLENE, reaction with oxygen atoms (553)
TRICHLOROFLUOROETHYLENE, reaction with cyclohexyl radicals (265)

TRICHLOROMETHYL RADICALS, combination of (481); reaction with cyclohexane (493); reaction with hydrogen bromide (481); reaction with hydrogen chloride (481); bimolecular self-reaction in solution (453)
TRIFLUOROETHYLENE, Arrhenius parameters of, for reaction with O atoms (443)
TRIFLUOROMETHYLAZOMETHANE, photolysis (517); reaction with trifluoromethyl radicals (517)
s-TRINITROTOLUENE, flash photolysis of (89)
VANADIUM(V), reduction with inositol (15)
VINYL FLUORIDE, Arrhenius parameters of, for reaction with O atoms (443)
XENON, collisional quenching of $O(2^1D_2)$ (77)

CHEMICAL KINETICS

CONTENTS

Volume VI, Issue Nos. 1–6, 1974

Issue No. 1, January

M. C. Lin: Chemical Lasers Produced from O(^3P) Atom Reactions. III. 5-μm CO Laser Emission from the O + CH Reaction 1

A. Kumar and R. N. Mehrota: Mechanism of Oxidation of Cyclohexanehexol (Inositol) by Quinquevalent Vanadium 15

W. Y. Wen and R. M. Noyes: Reactions of Halogens and Hydrogen Halides. Studies in the Cl_2 + HBr System 29

R. Koren, B. Perlmutter-Hayman, and R. Shinar: The Kinetics of the Reaction between Magnesium and EBT 39

W. L. Reynolds, E. S. Barber, and R. Crandall: Solvation of Ligandopentaammine-cobalt (III) Complexes in Dimethyl Sulfoxide–Water Mixtures 51

D. Husain and J. G. F. Littler: The Collisional Behavior of the Spin Orbit States of the Lead Atom, Pb($6^3P_{1,2}$), Studied by Time-Resolved Attenuation of Atomic Resonance Radiation 61

R. F. Heidner, III, and D. Husain: A Study of the Collisional Quenching of O(2^1D_2) by the Noble Gases Employing Time-Resolved Attenuation of Atomic Resonance in The Vacuum Ultraviolet 77

K. Suryanaryanan and C. Capellos: Flash Photolysis of 2,4,6-Trinitrotoluene Solutions. 89

M. Balakrishnan, G. Venkoba Rao, and N. Venkatasubramanian: Dipolar Aprotic –Protic Solvent Influences in the Hydrolysis of Diol Monoesters 103

I. R. Slagle, F. J. Pruss, Jr., and D. Gutman: Kinetics into the Steady State. I. Study of the Reaction of Oxygen Atoms with Methyl Radicals 111

H. M. Vyas and J. K. S. Wan: Electron Spin Resonance and Kinetic Study of the Photolysis of *p*-Flouranil (Tetrafluoro-*p*-Benzoquinone) in Dioxane 125

E. R. Gardner, F. M. Mekhail, and J. Burgess: Kinetics of Reactions of Schiff Base Complexes of Iron(II). V. Reactions of the Complex of the Hexadentate Ligand *NN'''*-Bis-[α-(2-pyridyl)benzylidene] triethylenetetramine in Acid Solution and with Hydroxide, Cyanide, and Peroxodisulphate 133

B. M. Dunn: Pathways of Proton Transfer in Acetyl Hydrolysis 143

M. C. Flowers and D. E. Penny: Kinetic Isotope Effects in the Thermal Gas Phase Reactions of 1,2-Epoxycyclohexane-3,3,6,6-d_4 161

Issue No. 2, March

A. C. Lloyd: Evaluated and Estimated Kinetic Data for Phase Reactions of the Hydroperoxyl Radical 169

R. L. Thommarson, G. C. Berend, and S. W. Benson: Molecular Relaxation Processes in Triatomic Molecules. II. The N_2–CO_2 System 229

P. P. Nechaev, Yu. V. Moiseev, Ya. S. Vygodskii, and G. E. Zaikov: Mechanism of the Acid Hydrolysis of Aromatic o-Carboxyamides and Relative Imides 245

M. J. Krech, S. J. W. Price, and W. F. Yared: Determination of $D[C_6F_5\text{-}I]$ by the Toulene Carrier Method 257

A. Horowitz, A. Mey-Marom, and L. A. Rajbenbach: The Kinetics of Free Radical Chain Reactions in the Solutions of Trichlorofluorethylene in Cyclohexane 265

E. Niki, K. Okayasu, and Y. Kamiya: Oxidation of Hydrocarbons in the Presence of Added Hydroperoxide. On the Determination of Rate Constants by the Hydroperoxide Method 279

Communication to the Editor

D. C. Tardy: Pentyl Radical Isomerizations: Evidence for a 1,2 or 1,3 Hydrogen Migration 291

Information for Contributors 295

Issue No. 3, May

D. M. Haaland and R. T. Meyer: Reaction of Excited Iodine Atoms with Methyl Iodide: Rate Constant Determinations 297

D. J. A. De Waal and W. Robb: Kinetic and Mechanistic Study of the Reactions of Palladium (II) Chloro Complexes with Ethylenediamine in Aqueous Acid Medium. 309

D. J. A. De Waal and W. Robb: Kinetics and Mechanism of the Reaction between N- and N,N'-methyl Ethylenediamines and Palladium (II) Chloro Complexes in Aqueous Acid Medium 323

K. Furukawa, D. G. L. James, and M. M. Papic: A Kinetic Study of the Reactions of the Hydrogen Atom with the Cyclohexadiene Isomers in the Gas Phase 337

D. M. Golden, Z. B. Alfassi, and P. C. Beadle: Very Low-Pressure Pyrolysis (VLPP) of Alkanes: *n*-Butane, 2,3-Dimethylbutane, 2,2', 3,3'-Tetramethylbutane, and Isobutane 359

K. W. Egger and P. Vitins: Thermochemical Kinetics of Nitrogen Compounds. V. The Unimolecular Thermal Decomposition of Diallylamine in the Gas Phase 371

Yu. N. Kozlov, A. D. Nadezhdin, and A. P. Pourmal: Initiation Process in the System $Fe^{3+} + H_2O_2$ 383

J. Olbregts: Reaction of Chlorine with Bromine 395

W. Wong and D. D. Davis: A Flash Photolysis-Resonance Fluorescence Study of the Reaction of Atomic Hydrogen with Molecular Oxygen $H + O_2 + M \rightarrow HO_2 + M$. 401

F. S. Toby and S. Toby: Reaction between Ozone and Allene in the Gas Phase 417

K. W. Egger and P. Vitins: The Thermochemical Kinetics of Retro-"Ene" Reactions of Molecules with the General Structure (Allyl)XYH in the Gas Phase. IX. The Thermal Unimolecular Decomposition of Ethyallylether in the Gas Phase 429

G. Coppens, G. J. Martens, M. Godfroid, J. Delvaux, and J. Verbeyst: Addition-Substitution Competition in Liquid-Phase Chlorinations 437

D. S. Jones and S. J. Moss: Arrhenius Parameters for Reactions of Oxygen Atoms with the Fluorinated Ethylenes 443

D. Griller and K. U. Ingold: Rate Constants for the Biomolecular Self-Reactions of Ethyl, Isopropyl, and *tert*-Butyl Radicals in Solution. A Direct Comparison 453

Issue No. 4, July

E. D. German and R. R. Dogonadze: The Kinetics of Nucleophilic Substitution Processes in the Alkyl Halides. Part A—Theory 457

E. D. German and R. R. Dogonadze: The Kinetics of Nucleophilic Substitution Processes in the Alkyl Halides. Part B—Analysis of Experimental Data 467

J. Currie, H. W. Sidebottom, and J. M. Tedder: The Reaction of Cyclohexyl Radicals with Carbon Tetrachloride 481

I. A. Matheson, H. W. Sidebottom, and J. M. Tedder: The Reaction of Trichloromethyl Radicals with Hydrogen Chloride and a New Estimation of the Rate of Combination of Trichloromethyl Radicals 493

C. Walling and T. Weil: The Ferric Ion Catalyzed Decomposition of Hydrogen Peroxide in Perchloric Acid Solution 507

N. L. Craig and D. W. Setser: Photolysis of 1,1,1-Trifluoromethylazomethane as a Source of Methyl and Trifluoromethyl Radicals 517

J. A. Howard and J. H. B. Chenier: On the Accuracy of the Hydroperoxide Method of Determining Absolute Rate Constants for Hydrogen Atom Abstraction by the *tert*-Butylperoxy Radical 527

T. Boddington, P. Gray, and B. J. Tyler: The Correction of Rate Data for the Effects of Internal Temperature Change 531

G. Debande and G. Huybrechts: Kinetics of the Addition of Propene to Cyclohexa-1,3-Diene in the Gas Phase 545

E. Sanhueza and J. Heicklen: The Reaction of $O(^3P)$ with C_2HCl_3 553

A. M. Hsu and T. T.-S. Huang: The Decomposition of Acetylenedicarboxylic Acid in Acetophenone 567

D. W. Follmer and G. O. Pritchard: The Unimolecular Decomposition of Vibrationally Excited l-Deuterio-1,1,2-trifluoroethane 573

A. Pastrana V. and R. W. Carr, Jr.: Rate of the Reaction of Hydroxyl Radical with Acetylene 587

R. L. Thommarson and C. C. Berend: Vibrational Relaxation of HF ($v = 1$) by F Atoms 597

Information for contributors 615

Issue No. 5, September

C. J. Chapman and R. P. Wayne: The Reaction of Atomic Oxygen and Hydrogen with Nitric Acid 617

K. Y. Choo, D. M. Golden, and S. W. Benson: Very Low-Pressure Pyrolysis (VLPP) of *t*-Butylmethyl Ether 631

I. B. Afanas'ev, S. V. Prigoda, T. Ya. Mal'tseva, and G. I. Samokhvalov: Electron Transfer Reactions Between the Superoxide Ion and Quinones 643

J. N. Pendlebury and R. H. Smith: Kinetics of the Reversible Reaction Between Arsenious Acid and Aqueous Iodine 663

Z. A. Schelly and M. M. Wong: The Solvent-Jump Relaxation Method Using Continuous Flow 687

I. K. Shakhnazaryan, G. A. Sachyan, A. G. Philipossyan, and A. B. Nalbandyan: The Kinetics and Mechanism of the Slow Oxidation of Hydrogen 693

L. W. Clark: The Kinetics of the Decarboxylation of Malonic Acid in Normal Alkanols. 713

K. H. Becker, U. Schurath, and H. Seitz: Ozone—Olefin Reactions in the Gas Phase. 1. Rate Constants and Activation Energies 725

S. Furuyama, R. Atkinson, A. J. Colussi, and R. J. Cvetanovic: Determination by the Phase Shift Method of the Absolute Rate Constants of Reactions of O(^3P) Atoms with Olefins at 25°C 741

W. G. Mallard and J. H. Owen: Rate Constant for H + H + Ar = H_2 + Ar From 1300 to 1700 K 753

P. Jeffers and S. H. Bauer: The Homogeneous Pyrolysis of 2-Butenes 763

Communication to the Editor

K. Swaminathan, K. Vaidynathan, and N. Venkatasubramanian: Reaction Between Phenyliodosoacetate and Amides—A Kinetic Study of the Oxidative Rearrangement 773

Issue No. 6, November

R. Walraevens, P. Trouillet, and A. Devos: Basic Elimination of HCl from Chlorinated Ethanes 777

L. A. Farrow and D. Edelson: The Steady-State Approximation: Fact or Fiction? 787

K. Martinek, A. A. Klyosov, N. F. Kazanskaya, and I. V. Berezin: The Free Energy–Reaction Coordinate Profile and α-Chymotryptic Hydrolysis of a Series of *N*-Acetyl-α-L-Amino Acid Methyl Esters 801

K. Y. Choo, G. D. Mendenhall, D. M. Golden, and S. W. Benson: The Pyrolysis of 2-Nitrosoisobutane and the Bond Dissociation Energies of Nitroso Compounds 813

K. L. Demerjian, J. G. Calvert, and D. L. Thorsell: A Kinetic Study of the Chemistry of the $SO_2(^1B_1)$ Reactions with *cis*- and *trans*-2-Butene 829

D. J. Kramer and G. G. Smith: Anichimeric Assistance in Vapor-Phase Acetate Thermolysis 849

K. W. Watkins and W. W. Word: Addition of Methyl Radicals to Carbon Monoxide: Chemically and Thermally Activated Decomposition of Acetyl Radicals 855

W. Squire: A Computer Program for the Kassel Integral 875

L. Batt, K. Christie, R. T. Milne, and A. J. Summers: Heats of Formation of C_1-C_4 Alkyl Nitrites (RONO) and RO-NO Bond Dissociation Energies 877

F. C. James and J. P. Simons: Yet Another Direct Measurement of the Rate Constant for the Recombination of Methyl Radicals 887

J. H. Alonso, W. R. Dolbier, Jr., and H. M. Frey: The Thermal Unimolecular Isomerization of 1,1-Divinylcyclopropane 893

T. L. Rose, R. J. Seyse, and P. M. Crane: Isomerization of Chemically Activated Bicyclo-[3.1.0 hex-2-ene] and Related C_6H_8 Isomers 899

G. L. Schott, R. W. Getzinger, and W. A. Seitz: Transient Oxygen Atom Yields in H_2–O_2 Ignition and the Rate Coefficient for $O + H_2 \rightarrow OH + H$ 921

Communication to the Editor
